

63. Implant according to claim 59, wherein the surface of the implant is wetted by said fluid lubricant, and the lubricant is swellable.

64. Implant according to claim 63, wherein the lubricant is a polysaccharide or glucosaminoglycan.

65. Implant according to claim 59, wherein the surfaces of the sheets include a hydrophobic surface.

66. Implant according to claim 65, wherein said implant contains fat or oil wetting the hydrophobic surface as the fluid lubricant.

67. Implant according to claim 59, wherein material is a plastic.

68. Implant according to claim 59, wherein material is a silicone rubber.

69. Implant according to claim 59, wherein the material comprises polydimethylsiloxane.

70. Implant according to claim 59, wherein the material is a polysaccharide.

71. Implant according to claim 70, wherein the plastic is cuprophane.

72. Implant according to claim 59, wherein the material has a foam structure.

73. Implant according to claim 59, wherein an X-ray contrast medium or a dye is incorporated into the material.

74. Implant for the reconstruction of soft tissue, said implant comprising: a plurality of unitary sheets, each of said unitary sheets comprising of a physiologically compatible material having a thickness of 10-200 μm and a surface that is wettable by a fluid lubricant, said unitary sheets being rolled to form concentric layers forming the implant, the concentric layers being slidable on one another.
